### A New 2021 educational series by David Attenborough

#### **Job 12:7-8**

*"But ask the animals, and they will teach you, or the birds of the air, and they will tell you; or speak to the earth, and it will teach you, or let the fish of the sea inform you."*

Happy New Year to all! As we begin 2021 with renewed hope and prayers, the Green Team looks forward to sharing useful news about environmental issues. Starting with global issues and ending with local action ideas, the January Green Team blurbs will help us start the year with education and action.

In this second Broadcast of 2021, we share a new 2021 educational series by David Attenborough that you can both enjoy and learn about global environmental issues. A Perfect Planet, from the BBC, is a fusion of natural history and earth science that explains how our living planet operates. This five-part series shows how the forces of nature drive, shape, and support Earth's great diversity of wildlife. The first four episodes explore the power of volcanoes, sunlight, weather and oceans. The final episode in the series looks at the dramatic impact of the world's newest force of nature -- humans - and what can be done to restore our planet's perfect balance.
