

**Summer Green Team Climate Care: 12 weeks Questions to Ponder and Act Upon*****Week 7 of Summer Creation Care: What is climate justice?***

Climate justice recognizes that marginalized communities experience the damaging impacts of climate change first and the worst. The climate justice movement is committed to addressing all of the root causes of the climate crisis. It is not just an environmental issue. It is a social, economic, and public health issue too. God implores us to be faithful: faithful stewards, faithful in following Christ, and faithful in loving our neighbors as ourselves.

Question to ponder and act upon:

- How is “creation and climate care” an issue of justice?
- How does it the climate crisis affect different communities?
- Where do we see climate and environmental injustices play out in our own community, at a neighborhood, city, and regional level?
